Report

Electronic design automation (EDA), is a category of software tools for designing electronic systems such as integrated circuits and printed circuit boards. The tools work together in a design flow that chip designers use to provide the designer with the tools they need to solve engineering problems and analyze entire semiconductor chips. Since a modern semiconductor chip can have billions of components, EDA tools are essential for their design; this article in particular describes EDA specifically with respect to integrated circuits (ICs). This course combines insightful sessions with practical lab exercises to reinforce key concepts to design, analyse and simulate the behaviour of a simple electrical circuit. It covers the basic elements of resistor, inductor, capacitor to Time domain and frequency domain analysis of electronic components like diode, BJT, FET and Opamp. Digital blocks like gate level simulation, FFs, Counters are designed and verified. Hands on training are given using P-SPICE ORCAD and Solve electric. The outcome of the course is students can design electronic circuits that can work in continuous and discrete mode of voltage. The course also conveys the knowledge on the design aspects at industry level, enabling the students for placement. The course was conducted from 10.08.2015 to 29.09.2015. About 25 students attended and benefitted by this course

Communicative English Training Program

The objective of the Confident program is to make students speak confidently in English. This involved breaking the students' inhibition to speak in English and dealing with the stage fright of students. Every session involved team or individual activity; every student got a chance to present on the stage. Trainers maintained a tracker where scores for each student's performance recorded. Communicative English Training Program

The objective of the Confident program is to make students speak confidently in English. This involved breaking the students' inhibition to speak in English and dealing with the stage fright of students.
