Expert / Speaker Details

Name, Designation, Organization : Mr.K.Kalidasan, President, OSAI environmental organization

Brief about Expert/Speaker : OSAI began its journey in January 2000 with a view to carry out conservation and environment oriented projects in South India, specifically in the Western Ghats. OSAI is energized by a selected few individuals from various walks of life with a concern for nature and wildlife. OSAI as the organization is better known is synonymous with awareness campaigns, conservation battles, and wildlife protection in its areas of operation. These areas include the Western Ghats, its rivers, and river basins. OSAI have been involved in the creation of eco-based activities in many parts of the state. Since its inception, OSAI's projects could be broadly classified under the following heads: Awareness campaigns Research studies Eco-oriented people-based projects Eco activism and Forming network Production of publicity material.

Outcome of the activity

Students got knowledge about the environmental protection and the issues that the planet is facing

Key Highlights

- Earth Day is observed every year on 22 April across the globe to raise awareness about environmental protection and the issues that the planet is facing. From oceans being filled with plastic, extreme heat to wildfires and floods, the earth is clearly urging a call to action. Also known as International Mother Earth Day, it is an occasion to join hands and acknowledge the global climate crisis which needs immediate attention. This special event focuses on the growing concerns of overpopulation, depleting quality of the environment and loss of biodiversity.
- This year's Earth Day theme is to 'Invest In Our Planet'. The theme will cater around building healthy cities, countries and economies. The objective of the theme is focused on

accelerating solutions to combat the world's greatest threat - climate change, and to initiate everyone to do their part.

- The Earth Day organization feels what each individual does, and how we do it has a huge impact on our ecosystems. This affects the pace of corporate and government action.
